EXPERIENCE

Full Stack Developer

November 2023 – Present

Heart of House

Anaheim, CA

- Collaborated closely with the company founder to strategize, plan, and architect key technological initiatives, ensuring alignment with business goals for our B2B SaaS product.
- Spearheaded the full software development lifecycle (SDLC), from requirement gathering and system architecture to implementation and testing.
- Performed in-depth market research, identifying gaps in existing products and defining essential features needed to optimize restaurant operations.

Full Stack Developer (Contract)

March 2023 – September 2023

Beyond Reproach

Remote

- Successfully proposed and secured a contract with a gourmet meal prep company led by Michelin-trained chefs, overseeing the architectural design of the project to align with specified deliverables.
- Led a development team in the creation of a custom server infrastructure, integrating advanced functionalities such as SMS, email communications, payment processing, and delivery management systems to enhance operational efficiency and customer satisfaction.
- Completed the contract one month ahead of the scheduled timeline.

Full Stack Developer (Contract)

March 2023 – May 2023

Calm Shrub

Remote

- Engineered and launched an eCommerce platform for a boutique arts and crafts retailer, aiming to amplify the artist's online presence and streamline direct sales.
- Conducted in-depth client consultations to precisely define website functionalities that blend promotional and commercial capabilities.
- Oversaw the integration of a custom content management system (CMS), enabling dynamic content updates and product management by the client.

PROJECTS

Templix | [Electron.js](#), [TypeScript](#), [React.js](#), [CSS](#), [Tailwind CSS](#), [Node.js](#), [Docker](#)

June 2023 – Present

- Developed a project template management desktop application to increase developer productivity by providing an intuitive visualization of templates and simplifying the process of scaffolding new projects
- Constructed a high-performance frontend leveraging component-based state management through React.js
- Created a user-friendly and responsive user interface aiming for superior user experience via Tailwind CSS
- Engineered a scalable and efficient backend system to handle business logic with Node.js

macfittondev.com | [HTML](#), [CSS](#), [JavaScript](#)

March 2023 – Present

- Created a portfolio website to display my professional projects, highlighting my skills as a freelance Full Stack Developer
- Implemented email support using Email.js, providing visitors with a simple method to contact me directly from the website
